Sheet 1

NAME: ARNAB SEN
EN.NO: 510519006 (Gx)
SUBJECT: DBMS Lab

Assignment No: 1

A. Creation of Tables:

Creating depts table:

query:

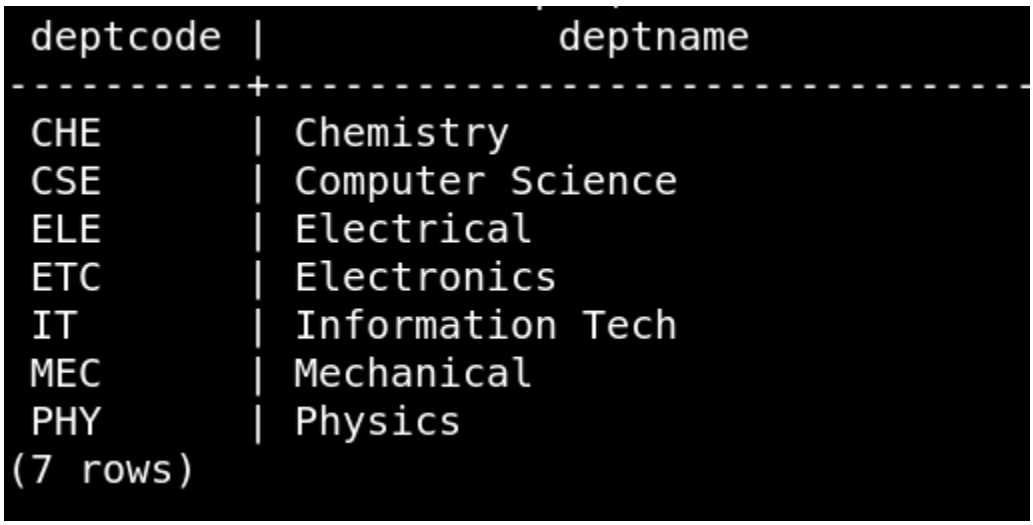
```
CREATE TABLE depts(
  deptcode char(3) PRIMARY KEY,
  deptname char(30) NOT NULL
);
```

```
lab=> \d depts
                  Table "public.depts"
  Column  |     Type      | Collation | Nullable | Default
----------+---------------+-----------+----------+---------
 deptcode | character(3)  |           | not null |
 deptname | character(30) |           | not null |
Indexes:
    "depts_pkey" PRIMARY KEY, btree (deptcode)
```

Inserting into depts table

query:

```
INSERT INTO
  depts(deptcode, deptname)
VALUES
  ('CHE', 'Chemistry'),
  ('CSE', 'Computer Science'),
  ('ELE', 'Electrical'),
  ('ETC', 'Electronics'),
  ('IT', 'Information Tech'),
  ('MEC', 'Mechanical'),
  ('PHY', 'Physics');
```



```
 deptcode |            deptname
----------+--------------------------------
 CHE      | Chemistry
 CSE      | Computer Science
 ELE      | Electrical
 ETC      | Electronics
 IT       | Information Tech
 MEC      | Mechanical
 PHY      | Physics
(7 rows)
```

Creation of students table:

query:

```
CREATE TABLE students(
  rollno numeric(8) PRIMARY KEY,
```

```
  name char(30),
  bdate date CHECK(bdate > date('1997-01-01')),
  deptcode char(3) REFERENCES depts(deptcode) ON DELETE CASCADE,
  hostel numeric CHECK(hostel < 10),
  parent_inc numeric(8, 1)
);
```

```
lab=> \d students
                Table "public.students"
   Column   |     Type      | Collation | Nullable | Default
------------+---------------+-----------+----------+---------
 rollno     | numeric(8,0)  |           | not null |
 name       | character(30) |           |          |
 bdate      | date          |           |          |
 deptcode   | character(3)  |           |          |
 hostel     | numeric       |           |          |
 parent_inc | numeric(8,1)  |           |          |
Indexes:
    "students_pkey" PRIMARY KEY, btree (rollno)
Check constraints:
    "students_bdate_check" CHECK (bdate > '1997-01-01'::date)
    "students_hostel_check" CHECK (hostel < 10::numeric)
Foreign-key constraints:
    "students_deptcode_fkey" FOREIGN KEY (deptcode) REFERENCES depts(deptcode) ON DELETE CASCADE
```

Inserting into students table

query:

```
INSERT INTO students
VALUES      ( '51052985','Jayant','2000-01-01','MEC','1','8780000' );

INSERT INTO students
VALUES      ( '51054491','Shaan','2000-07-25','PHY','2','7460000' );

(28 rows)
```

Creation of of crs_regd table:

query:

```
CREATE TABLE crs_regd(
  crs_rollno numeric(8) REFERENCES students(rollno),
  crs_cd char(5) REFERENCES crs_offrd(crs_code),
  marks numeric(5, 2),
```

```
  PRIMARY KEY(crs_rollno, crs_cd)
);
```

```
lab=> \d crs_regd
                Table "public.crs_regd"
   Column   |     Type     | Collation | Nullable | Default
------------+--------------+-----------+----------+---------
 crs_rollno | numeric(8,0) |           | not null |
 crs_cd     | character(5) |           | not null |
 marks      | numeric(5,2) |           |          |
Indexes:
    "crs_regd_pkey" PRIMARY KEY, btree (crs_rollno, crs_cd)
Foreign-key constraints:
    "crs_regd_crs_cd_fkey" FOREIGN KEY (crs_cd) REFERENCES crs_offrd(crs_code)
    "crs_regd_crs_rollno_fkey" FOREIGN KEY (crs_rollno) REFERENCES students(rollno)
```

Inserting into crs_regd table:

query:

```
INSERT INTO crs_regd
VALUES      ('51052985','MEC_1',100);

INSERT INTO crs_regd
VALUES      ('51052985','MEC_2',71);

INSERT INTO crs_regd
VALUES      ('51052985','MEC_3',93);

INSERT INTO crs_regd
VALUES      ('51052985','MEC_4',84);

INSERT INTO crs_regd
VALUES      ('51052985','ETC_1',77);

INSERT INTO crs_regd
VALUES      ('51052985','ELE_2',74);
```

```
INSERT INTO crs_regd
VALUES      ('51054491','PHY_1',73);

INSERT INTO crs_regd
VALUES      ('51054491','PHY_2',81);

INSERT INTO crs_regd
VALUES      ('51054491','PHY_3',89);

INSERT INTO crs_regd
VALUES      ('51054491','PHY_4',74);

INSERT INTO crs_regd
VALUES      ('51054491','ELE_1',73);
```

crs_rollno	crs_cd	marks
51052985	MEC_1	100.00
51052985	MEC_2	71.00
51052985	MEC_3	93.00
51052985	MEC_4	84.00
51052985	ETC_1	77.00
51052985	ELE_2	74.00
51054491	PHY_1	73.00
51054491	PHY_2	81.00
51054491	PHY_3	89.00
51054491	PHY_4	74.00
51054491	ELE_1	73.00
51054491	CHE_2	79.00
51053017	IT_1	76.00
51053017	IT_2	72.00
51053017	IT_3	86.00
51053017	IT_4	92.00
51053017	MEC_1	70.00
51053017	PHY_2	98.00

Note: For the above table **crs_regd** I have populated the table with a lot of data, but have mentioned only a few queries. The other queries have the same format just the values are a bit different.

B. Queries and their Solutions:

1. Try inserting records that violate the constraints:

1. Trying to insert rows with duplicate keys

```
lab=> INSERT INTO
  depts
VALUES
  ('CSE', 'Computer Science');
ERROR:  duplicate key value violates unique constraint "depts_pkey"
DETAIL:  Key (deptcode)=(CSE) already exists.
```

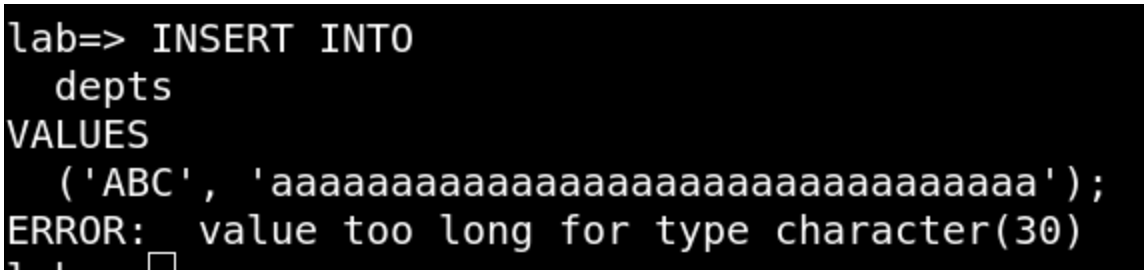
Explanation: deptcode is a primary key and hence it has to be UNIQUE. Here, I was trying to insert another record with the same **deptcode** and hence showed the error "Key already exists".

2. Violating NOT NULL constraint

```
lab=> INSERT INTO
  depts
VALUES
  ('ABC', Null);
ERROR:  null value in column "deptname" violates not-null constraint
DETAIL:  Failing row contains (ABC, null).
```

Explanation: deptname has a NOT NULL constraint which means it must always have a value. Here I was trying to insert a record where **deptname** was NULL and hence we get a "violates not-null constraint" error.

3. Violating size constraint



Explanation: deptname has a size constraint of max 30. Here, I was trying to insert a record where **deptname** is longer than 30 chars and hence gives the error "value too long".

2. Delete records from dept where deptcode='CSE'. (This deletes records from students whose deptcode='CSE')

query:

```
DELETE FROM
  depts
WHERE
  deptcode = 'CSE';
```

Before Deleting

dept table

```
 deptcode |            deptname
----------+--------------------------------
 CHE      | Chemistry
 CSE      | Computer Science
 ELE      | Electrical
 ETC      | Electronics
 IT       | Information Tech
 MEC      | Mechanical
 PHY      | Physics
(7 rows)
```

students table (displaying those with deptcode='CSE')

```
lab=> SELECT * FROM students WHERE deptcode='CSE';
  rollno  |             name             |   bdate    | deptcode | hostel | parent_inc
----------+------------------------------+------------+----------+--------+------------
 51058167 | Divij                        | 2000-02-14 | CSE      |      6 |  6290000.0
 51053419 | Keya                         | 2001-07-25 | CSE      |      6 |  5570000.0
(2 rows)
```

<u>After Deleting</u>

dept table

```
 deptcode |            deptname
----------+--------------------------------
 CHE      | Chemistry
 ELE      | Electrical
 ETC      | Electronics
 IT       | Information Tech
 MEC      | Mechanical
 PHY      | Physics
(6 rows)
```

students table (displaying those with deptcode='CSE')

```
lab=> SELECT * FROM students WHERE deptcode='CSE';
 rollno | name | bdate | deptcode | hostel | parent_inc
--------+------+-------+----------+--------+------------
(0 rows)

lab=> SELECT * FROM students;
  rollno  |              name               |   bdate    | deptcode | hostel | parent_inc
----------+---------------------------------+------------+----------+--------+------------

 51050488 | Hunar                           | 2000-11-09 | CHE      |      3 |  3020000.0
 51051744 | Pari                            | 2001-04-01 | ETC      |      8 |  7820000.0
 51050192 | Anay                            | 2000-11-18 | CHE      |      7 |  2500000.0
 51052466 | Misha                           | 2000-09-27 | MEC      |      3 |  1820000.0
(28 rows)
```

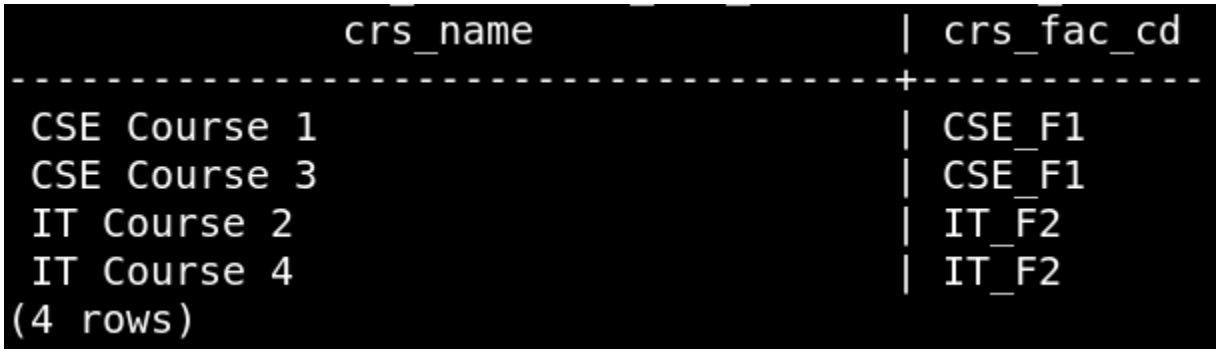
After the delete operation, the record containing **deptcode='CSE'** are deleted from the **depts** table. The records having **deptcode** as **'CSE'** are also deleted from the table students as deptcode is the foreign key in table students referring to the deptcode of table depts and on delete cascading occurs.

3. Find out the courses offered by the faculty dbp and nls.

Since I have used different faculty codes so I have replaced **dbp** with **CSE_F1** and **nls** with **IT_F2.**

query:

```
SELECT
  crs_name,
  crs_fac_cd
FROM
  crs_offrd
WHERE
  crs_fac_cd = 'CSE_F1'
  OR crs_fac_cd = 'IT_F2';
```



```
             crs_name              | crs_fac_cd
-----------------------------------+------------
 CSE Course 1                      | CSE_F1
 CSE Course 3                      | CSE_F1
 IT Course 2                       | IT_F2
 IT Course 4                       | IT_F2
(4 rows)
```

Explanation: We are displaying only two attributes course name and course faculty code so we have specified that under SELECT. And since we will have to find all the courses we are using an OR logical operator.

4. Find out the courses with full details offered by dbp.

Since I have used different faculty codes so I have replaced **dbp** with **CSE_F1**.

query:

```
SELECT
```

```
  *
FROM
  crs_offrd
WHERE
  crs_fac_cd = 'CSE_F1';
```

```
 crs_code |              crs_name               | crs_credits | crs_fac_cd
----------+-------------------------------------+-------------+------------
 CSE_1    | CSE Course 1                        |         4.0 | CSE_F1
 CSE_3    | CSE Course 3                        |         6.0 | CSE_F1
(2 rows)
```

Explanation: We had to display every attribute so I used SELECT * and in the WHERE clause I specified the condition that the course faculty code must be CSE_F1.

5. Get the courses the credits of which lie between 4.0 and 6.0.

query:

```
SELECT
  *
FROM
  crs_offrd
WHERE
  crs_credits > 4.0
  AND crs_credits < 6.0;
```

```
lab=> SELECT * FROM crs_offrd WHERE crs_credits > 4.0 AND crs_credits < 6.0;
 crs_code |              crs_name               | crs_credits | crs_fac_cd
----------+-------------------------------------+-------------+------------
 CSE_2    | CSE Course 2                        |         5.0 | CSE_F2
 CHE_2    | CHE Course 2                        |         5.0 | CHE_F2
 ETC_2    | ETC Course 2                        |         5.0 | ETC_F2
 ELE_2    | ELE Course 2                        |         5.0 | ELE_F2
 IT_3     | IT Course 3                         |         5.0 | IT_F1
 MEC_3    | MEC Course 3                        |         5.0 | MEC_F1
 PHY_3    | PHY Course 3                        |         5.0 | PHY_F1
(7 rows)
```

Explanation: Since we had two conditions so we used the AND operator to specify that we need those courses whose credits lie in the range 4.0 and 6.0.

6. Get the courses the credits of which are > 6.5.

query:

```
SELECT
  *
FROM
  crs_offrd
WHERE
  crs_credits > 6.5;
```

```
lab=> SELECT * FROM crs_offrd WHERE crs_credits > 6.5;
 crs_code |              crs_name               | crs_credits | crs_fac_cd
----------+-------------------------------------+-------------+------------
 CSE_4    | CSE Course 4                        |         7.0 | CSE_F2
 CHE_4    | CHE Course 4                        |         7.0 | CHE_F2
 ETC_4    | ETC Course 4                        |         7.0 | ETC_F2
 ELE_4    | ELE Course 4                        |         7.0 | ELE_F2
 IT_2     | IT Course 2                         |         7.0 | IT_F2
 MEC_4    | MEC Course 4                        |         7.0 | MEC_F2
 PHY_4    | PHY Course 4                        |         7.0 | PHY_F2
(7 rows)
```

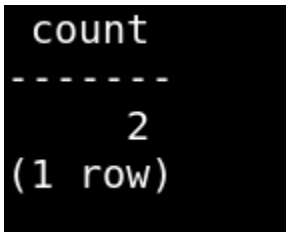
Explanation: Here we just have one condition that the crs_credits must be greater than 6.5.

Assignment No: 2

1. Count the number of students in the CSE dept.

query:

```
SELECT
  COUNT(*)
FROM
  students
WHERE
  deptcode = 'CSE';
```



Explanation: Since we need the count of the students I used the COUNT keyword, also there is a condition that the student must be in the CSE dept so, I added the WHERE clause specifying that deptcode must be equal to CSE.

2. Determine the minimum, maximum, and average marks of each course.

query:

```
SELECT
  crs_cd,
  crs_name,
  MIN(marks) AS min_marks,
  MAX(marks) AS max_marks,
  AVG(marks) AS avg_marks
```

```
FROM
  crs_regd,
  crs_offrd
WHERE
  crs_cd = crs_code
GROUP BY
  crs_cd,
  crs_name;
```

crs_cd	crs_name	min_marks	max_marks	avg_marks
ELE_2	ELE Course 2	71.00	99.00	88.4615384615384615
